

Important

There is a Lost and Found now located in the 2nd floor laundry room which is near the hair salon.

Here you can find anything that may have been misplaced: washcloths, socks, etc. Please come look if you are missing anything.

~ **You Pick It** on Sundays: come gather with friends playing different games that you choose.

~**Happy Hour:** come for appetizers and drinks before supper in the dining room.

Chocolate for Valentine's Day – Benefits of Dark Chocolate

Heart-shaped boxes of chocolate are everywhere on Valentine's Day. The intriguing question, debated by scientists for decades, is whether the candy inside helps your heart.

Popular mythology holds that chocolate is good for your heart, and that dark chocolate is better than milk chocolate. If chocolate does turn out to be an effective heart medicine, we foresee no problem getting people to comply with the prescription. In fact, the average American already consumes 14 pounds of chocolate each year.

When it comes to chocolate and the heart, the focus is on the dark stuff. Small, short-term studies suggest dark chocolate has some potential heart health benefits, including decreased blood pressure and blood clotting, increased blood vessel health, and improved LDL cholesterol.

Dark chocolate is rich in a group of antioxidants called flavanols – believe to be the “active” ingredient that confers chocolate’s cardiovascular advantage. Experimental studies demonstrate several potential benefits of flavanols, including lowering blood pressure and reducing blood clotting. That’s why we give the nod to dark chocolate over milk chocolate for its potential heart benefits.

Here’s our verdict: In small amounts, chocolate can be part of a heart-healthy lifestyle. But don’t forget about the calories. A standard chocolate bar contains 200 to 300 calories. And a single piece of premium chocolate from that heart-shaped box can have up to 70 calories. So, enjoy your dark chocolate in moderation.
